

View list of voter's serial numbers, bus sequences for ballot box transportation, and 50m restricted signage zones

By 01 Sep (Polling Day)

View

Candidates and polling agents may observe that polling is carried out in accordance to the law. They may check against the list of voter's serial numbers to verify whether a voter is eligible to vote at the polling station. You can download the list by electoral division.

Candidates and polling agents may observe the process to transport the sealed ballot boxes from polling stations to counting centres. Buses may be used for the transportation and one bus may serve more than one polling station. You can download the sequence of polling stations that the bus serves.

Display of banners, flags and posters within a radius of 50m from a polling station is prohibited. You should access OneMap to check the 50m restricted signage zone for each polling station to ensure that your banners, flags and posters are displayed outside the restricted signage zones.
